

ABSORBSELECT

## Custom Engineered Selective Absorption for Any Environment

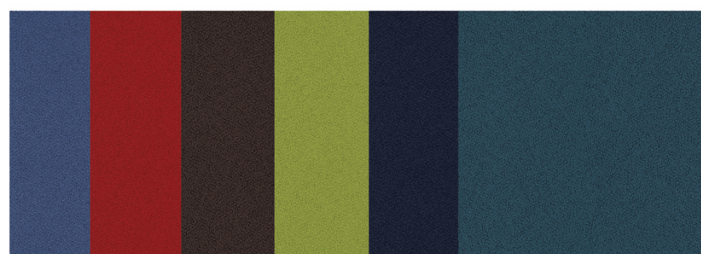

ABSORB Select is a finely tuned selective absorber that attenuates low frequency sound while diffusing high-frequencies. The optimized front plate uses the same algorithm used to engineer the sequence of our flagship DIFFUSE Signature product. The result is coherent speech intelligibility and tonal uniformity.

**Application:** Schools, offices, libraries, public spaces, restaurants, coffee shops, breweries, performance spaces, auditoria, recital halls, lecture halls, band practice facilities, orchestra pits, recording studios, recording control rooms, broadcast studios, production and post-production facilities, critical listening rooms, home theaters, and conference rooms.

**Characteristics:** ABSORB Select is a frequency-specific acoustic absorption product for increased acoustical clarity. The combination of absorption and diffusion creates an environment free of noise and full of beneficial acoustic energy to improve intelligibility in a wide variety of listening conditions.

**Mounting:** Mount with Roto-fast clips, Z-clips, impaling clips or appropriate construction adhesive.

**Finishes:** Available wrapped with premium acoustical fabrics from Guilford of Maine in a wide array of colors. Also available with our state-of-the-art SURFACE Gloss or SURFACE Matte finishes. Available unfinished for economical installs.

**Panel Size Options:** ABSORB Select is available in various sizes. Available in 1", 2", 3" and 4" thicknesses. Standard sizes include 2' x 4', 4' x 4', and 4' x 8'. Custom sizes are available.

**Fire and Environmental:** Fiberglass products are Class A fire rated. LEED v4 credit and pilot credit qualified.

**Acoustical Data:** Extensive acoustical test data is available through our website including absorption tests in agreement with ASTM C-423.
